

COURSE INFORMATION by Dr. Ralf Otterpohl

1. Geomancy / Geobiology Training (English with some French/German)

This geomancy / geobiology seminar introduces essential energetic structures on the body, in buildings and in landscapes and their intrinsic relationships. Practical approaches to harmonizing people's energy fields, homes, and surroundings will be explored, applied and learned. The goal is to recognize the entire energetic system interacting with humans and nature.

Geobiological/geomantic structures like the earth grids and water veins are present in all places. We learn to perceive with our energy body (energy lines, elemental beings), mental body (parasitic entities, manipulators, synthetic/AI-entities, ghosts of deceased people, energetic imprints), and intuitive body (transpersonal, remote sensing, angelic realms). We work according to the clear structures of the ancient science of "geomancy," which involves "divining" and magical healing/shaping of energy fields in spaces and landscapes.

2. Course Dates

Start date: April, 19th 2026

End date: April, 23th 2026

3. Course Format / Type

Explanation of geomantic structures, frequent exercises in perception. Healing work at the building, parks and village. Specific exercises for small groups.

4. Core Faculty

Dr. Ralf Otterpohl

5. Guest Faculty (if any)

Surprise Guest

6. Languages of Instruction

English (support in French and German are possible)

7. Course Description (Short)

This one-week seminar plus some month of application with friends can be a starting point for a geomancy career after some more training courses.

8. Course Description (Main Text)

Saturday, April 18th: Opportunity for a group dinner at a nearby restaurant.

Sunday, April 19th: 3pm-8pm

Starting with Etheric Hygiene: The daily exercise of raising our Energy Intensity.

Introduction (Seminar Room or in the hotel's private park): The basic structures of geomancy as a science of perceivable but only indirectly measurable phenomena. Physical explanations according to the polymath Dan Winter (whom we will meet) in simple terms, Golden Ratio, cold plasma, and more. Perspectives of other cultures around the world will be presented. Q&A and short repetition.

Geomantic phenomena like elementals (focus on Tuesday) perceived through one's own body. Practical exercises in the park. Learning to sense, gaining trust in one's own perception. Short repetition and break.

Presenting and practicing test methods such as the body pendulum, divining rods (rods will be provided), pendulum, tensor, O-ring test, and many more. Practical exploration of aura layers and divining water veins and the 12-grid system. Repetition and questions.

Monday, April 20th:

Starting with Etheric Hygiene: The daily exercise of raising our Energy Intensity.

Some theory: Focus on "Basic System and the World of Elemental Beings". Perceiving elementals with a sensitized hand and remote perception on the body, in rooms, in the landscape, as well as tech entities. Elementals are the emotional level of nature. Natural and healing interaction with these diverse entities, practicing in small groups with alternating guidance. Repetitions and questions. Excursion into the surrounding area (on foot) with the perception of small and large elementals on plants, trees, in the river on stones, as well as on the mountains. Healing work with and for elementals. Harmonization of tech entities: cell towers, cars, etc.

Tuesday, April 21th:

Starting with Etheric Hygiene: The daily exercise of raising our Energy Intensity.

Theory - Focus on "Water Veins, Grid Systems, Power/Ley Lines, and Dragon Lines".

Understanding the basic systems and their functions. Identifying and resolving energetic disturbances and energy drain in homes and landscapes. Locating the line-systems using angle rods (intensive practice with the rods). Small groups make the 12 line-systems visible in the field, including the grid lines. These line-systems are found everywhere on Earth and carry certain qualities. Practical demonstration of ending energy drains and theft, which is very common and steals life force from us and nature. Practice in small groups. Methods of

success control, the level of "leaders" in parasitic entities and manipulators, and their transformation/liberation. Full vital energy is a key condition for happiness, work successfully and also for the healthy and fast growth in gardens and fields.

Wednesday, April 22th:

Starting with Etheric Hygiene: The daily exercise of raising our Energy Intensity.

Theory - Focus on "Spirits of the Deceased and Other Civilizations". Why are there millions of earthbound spirits? How to deal with them and how to free them? What are "previous lives" on Earth and other planets? How do we deal with them? Q&A sessions. Short role-plays demonstrating how to deal with absentees and the deceased. Practicing perception, mindful contact, and the liberation of spirit beings from the deceased who wish for it. Work in small groups with alternating guidance.

Thursday, April 23th:

Starting with Etheric Hygiene: The daily exercise of raising our Energy Intensity.

Overview of all topics covered in the seminar and their connection to diverse experiences. Ethics of geomancy work. Practice in small groups with alternating guidance. This training leads to the ability to continue practicing independently and working with small groups. Closing circle: self-assessment, Q&A, feedback, arranging practice groups or contacting local groups. How to build such a group oneself? Further discussion for personal pathways to work in geomancy/geobiology.

Friday, April 24th:

Rooms need to be cleared by 11am, luggage can be stored. Opportunity to arrange longer excursions with other participants privately. A training in Psychomancy (removing blockages for personal growth) takes place in the week before. Combining both is suitable and possible.

9. Course Structure & Daily Rhythm

9:00 AM - 2:00 PM daily with breaks, bring a notebook to add to the detailed seminar materials. **Sunday 3pm to 8pm to make arrivals easier.**

10. Intended Audience

Participation is open to all and also for children if they come with their parents (children are free from the fees). This seminar enables further personal practice and working with small groups, which can potentially lead to a side job, given sufficient practice. The seminar includes practical exercises both indoors and outdoors (bring suitable clothing, we are in the mountains). We train direct intuitive perception and work with dowsing rods, pendulums, or tensors (feel free to bring your own devices). The aim is to grasp the diverse, magnificent opportunities for personal and societal growth that the new energy fields present.

11. Practical Information

The seminar takes place in Vernet les Bains. We are in a private hotel with its own huge park and pool, participants can share the professional kitchen to prepare healthy organic meals. Self-organized, meals are not included. Shopping in the neighborhood. From

the nearby stunning old town Villefranche de Conflent there are buses to the nearby city of Perpignan at the coast. Vernet les Bains is located in the Mediterranean Pyrenees, South France. Many transport options, Girona near Barcelona is Spain's budget airport, else Barcelona, Toulouse or Perpignan.

Vernet is a beautiful ancient town and has several cafes and restaurants, hot springs, and attracts hikers. We are at the foot of the mighty power spot Pic du Canigou (2,785 meters) at 700 meters altitude, great hiking opportunities from the hotel.

12. Price & Conditions

The one-week course in a small group with half-day schedules costs € 450,- (ask for early bird with 350,-). Affordable hotel rooms of the seminar venue can be booked depending on availability. These will be offered when an application for participation is sent. Self-prepared meals by the group are possible and there is a choice of local restaurants and cafes in walking distance.

13. Registration / Application

Apply through this website or directly to Julia: jw ATT gartenring.org
